

Junior Automation Tester

With about 7,000 people, and customers in over 20 countries, Ness is the right size to provide you with the deep partnership you need to realize your business and technology goals. It starts with making your goals our goals and ends with an inventive and flexible solution for your most pressing challenges. Our award-winning IT services, teams, and skill-sets scale globally as your business evolves and are delivered in the combination of on-site, near-shore or off-shore that works best for you.

We're having a big diversity of projects from desktop to mobile, web or client-server applications to Cloud apps. We're interested in investing in your potential, knowledge and possibility of growing with us as we expand and anchor as professional team and office both in Iasi market and within Ness Technologies.

We're interested in a colleague that will bring his contribution in the automation testing team on both Web and Mobile application testing areas.
